

STROLLER FAN

MANUAL - D07

I. OPERATION

- Short press the FAN button to turn on the fan and switch between speed levels 1, 2 and 3. Press and hold the button to turn the fan off.
- Short press the LED button to turn the light on and switch between levels 1, 2 and 3. Press and hold the button to turn the light off.
- The product can also operate via USB power without a battery installed.
- The product is designed for use on a stroller to provide air circulation under adult supervision.

The battery is pre-installed in the product. Check that the battery is correctly positioned according to the polarity markings (+) and (-). When replacing the battery, insert it according to the polarity markings (+) and (-).

II. CHARGING

- Charging time: 2–3 hours (tested with a 5V-2A charger).
- When connected to DC 5V power, the red indicator light flashes during charging, and stays on once fully charged. Use a 5V-2A charger. If a lower output charger such as 5V-1A is used, charging time will be longer.

III. TECHNICAL SPECIFICATIONS

- Power: 10 W (max)
- Input voltage: DC 5V
- Battery: Lithium-ion 3.7V
- Working power: 3 W
- Input current: 2A
- Product dimensions: 67 × 137 × 280 mm

IV. SAFETY INFORMATION

- This product is not a toy and must always be used under adult supervision.
- Improper use of the product may result in risk of injury.
- The product must be securely attached to the stroller before use.
- The product must not be used in a bed, crib or other sleeping environments.
- Do not place the product near heat sources or in high temperature environments.
- Store the product in a dry environment.
- Do not place the product near open flames.

- Do not disassemble, open, cut or puncture the product.
- Stop using the product immediately if malfunction or abnormal operation occurs.
- If the product is not used for a long period, recharge the battery every 2–3 months to maintain battery performance.

V. WARNING

- Incorrect battery installation may cause a short circuit and may result in fire hazard.
- Remove the battery and disconnect the power supply before cleaning the product.
- Do not insert objects or fingers into the fan to avoid injury.
- Batteries must not be disposed of with household waste. Used batteries must be delivered to an approved recycling facility.
- Remove the battery if the product will not be used for a long period.
- This product contains a rechargeable lithium-ion battery. The battery must only be replaced with the same type.
 - If the battery is not installed, the fan should be stored separately from the battery.
 - When the battery is not in use, keep it away from metal objects such as paper clips, coins, keys, nails or screws which may create contact between the battery terminals. Short circuits may cause fire or injury.

c) Do not burn the battery or expose it to open flames, even if severely damaged. The battery may explode if exposed to fire. Disposal of batteries and electronic components must comply with applicable regulations.

VI. MAINTENANCE

Clean the product with a dry or slightly damp cloth. The product must not be immersed in water or other liquids. If the product is not used for a longer period, it is recommended to charge the battery every 2–3 months to maintain battery performance.

VII. TROUBLESHOOTING

Fault	Cause	Solution
Power indicator not on	Battery is empty or USB connection is faulty	Recharge the battery or check the connection
Product does not start	Battery is missing or depleted	Check the battery, insert it correctly, and recharge
Product does not charge	Battery installed incorrectly or incompatible charger	Check battery orientation and use a correct charger
Charging takes too long	Charger output is below 2A	Use a more powerful charger

VIII. DISPOSAL (WEEE)

This product contains electronic components and a battery and must not be disposed of with normal household waste. The product must be delivered to an approved collection point for electrical and electronic equipment in accordance with local regulations.

IX. CE COMPLIANCE

This product complies with the applicable requirements of relevant EU regulations for electrical and electronic equipment, including electromagnetic compatibility (EMC), restriction of hazardous substances (RoHS), and general product safety requirements. The CE marking confirms that the product meets the applicable requirements for safety, health, and environmental protection within the EU/EEA. EU Declaration of Conformity is available upon request.
